## Safeguarding your employees' future and improving financial security

### Having money in savings is life changing.

When your employees begin to save money for an emergency or to make a large purchase, they begin to make positive choices for their future, reduce their stress, and manage their anxiety. Currently, over 65% of adults in the UK do not have enough money in savings to survive for 3 months.

Through **Money@Work**, **GWCU** will support your employees to save for their future goal. They'll nominate an amount they want to save, and this will be deducted automatically from their salary.

Employees will see their savings grow month after month, effortlessly. They'll get a competitive interest rate and their savings are protected by the FSCS up to £85,000.

**“A massive thank you for the flexible way your organisation has been able to support us.”**
